Assignment

Program

branch 1 $\rightarrow \epsilon \$ \beta$

$$\begin{aligned} \text{branch 2} &\rightarrow \text{first(statement)} = \text{first(assignmt)} \cup \text{first(ifstmt)} \cup \text{first(until)} \cup \text{first(read)} \cup \text{first(write)} \\ &= \text{first(ident)} \cup \epsilon I \beta \cup \epsilon U \beta \cup \epsilon R \beta \cup \epsilon W \beta \\ &= \text{first(letter)} \cup \epsilon I \beta \cup \epsilon R \beta \cup \epsilon W \beta \\ &= \epsilon, X, Y, Z, I, U, R, W \beta \\ &\rightarrow \epsilon, X, Y, Z, I, U, R, W \beta \cap \epsilon \$ \beta = \emptyset \end{aligned}$$

Statement

branch 1 $\rightarrow \text{first(assignmt)} = \text{first(ident)} = \text{first(letter)} = \epsilon, X, Y, Z \beta$

branch 2 $\rightarrow \text{first(ifstmt)} = \epsilon I \beta$

branch 3 $\rightarrow \text{first(until)} = \epsilon U \beta$

branch 4 $\rightarrow \text{first(read)} = \epsilon R \beta$

branch 5 $\rightarrow \text{first(write)} = \epsilon W \beta$

$\rightarrow \epsilon, X, Y, Z \beta \cap \epsilon I \beta \cap \epsilon U \beta \cap \epsilon R \beta \cap \epsilon W \beta = \emptyset$

Assignmt

there are no decision points in this one

writing

Ifstmt

branch 1 $\rightarrow \text{first(statement)} = \text{first(assignmt)} \cup \text{first(ifstmt)} \cup \text{first(until)} \cup \text{first(read)} \cup \text{first(write)}$

branch 2 $\rightarrow \epsilon \% \beta$

branch 3 $\rightarrow \epsilon \$ \beta$

$\rightarrow \epsilon, X, Y, Z, I, U, R, W \beta \cap \epsilon \%, \$ \beta = \emptyset$

Until

branch 1 $\rightarrow \text{first(statement)} = \text{first(assignmt)} \cup \text{first(ifstmt)} \cup \text{first(until)} \cup \text{first(read)} \cup \text{first(write)}$

branch 2 $\rightarrow \epsilon \backslash \beta$

$\rightarrow \epsilon, X, Y, Z, I, U, R, W \beta \cap \epsilon \backslash \beta = \emptyset$

Read

branch 1 $\rightarrow \epsilon ; \beta$

branch 2 $\rightarrow \epsilon, \beta$

$\rightarrow \epsilon ; \beta \cap \epsilon, \beta = \emptyset$

Write

branch 1 $\rightarrow \epsilon ; \beta$

branch 2 $\rightarrow \epsilon, \beta$

$\rightarrow \epsilon ; \beta \cap \epsilon, \beta = \emptyset$

comprsn

there are no decision points in this one

inclusion

Exprsn

branch 1 $\rightarrow \text{follow}(\text{exprsn}) = \epsilon; ; 3 \cup \epsilon) 3 = \epsilon; ; 3$

branch 2 $\rightarrow \epsilon + 3$

$\rightarrow \epsilon; ; 3 \cap \epsilon + 3 = \emptyset$

Factor

branch 1 $\rightarrow \text{follow}(\text{factor}) = \text{follow}(\text{exprsn}) \cup \epsilon + 3 = \epsilon; ; , + 3$

branch 2 $\rightarrow \epsilon * 3$

$\rightarrow \epsilon; ; , + 3 \cap \epsilon * 3 = \emptyset$

inclusion

Oprnd

branch 1 $\rightarrow \text{first}(\text{integer}) = \text{first}(\text{digit}) = \epsilon 0, 1, 2, 3, 4, 5, 6, 7, 8, 9, 3$

branch 2 $\rightarrow \text{first}(\text{ident}) = \text{first}(\text{letter}) = \epsilon - , . , x, y, z, 3$

branch 3 $\rightarrow \epsilon (3)$

$\rightarrow \emptyset$ because all 3 branches are disjoint

inclusion

Opratr

too trivial to prove

inclusion

Ident

branch 1 $\rightarrow \text{first}(\text{char}) = \text{first}(\text{digit}) \cup \text{first}(\text{letter}) = \epsilon 0, 1, 2, 3, 4, 5, 6, 7, 8, 9, - , . , x, y, z, 3$

branch 2 $\rightarrow \text{follow}(\text{digit}) = \epsilon; ; 3 \cup \epsilon, 3 \cup \epsilon; 3 \cup \epsilon, 3 \cup \epsilon \sim 3 \cup \text{follow}(\text{oprnd}) = \epsilon; ; , \sim 3 \cup \epsilon \sim 3 \cup$

$\text{first}(\text{opratr}) \cup \epsilon + 3 \cup \text{follow}(\text{factor}) = \epsilon; ; , \sim 3, <, =, !, *, ; ,) + 5$

$\rightarrow \epsilon - , . , x, y, z, 0, 1, 2, 3, 4, 5, 6, 7, 8, 9, 3 \cap \epsilon^* ; , ; , +, <, =, !, *, ; ,) + 5 = \emptyset$

inclusion

Char

branch 1 $\rightarrow \text{first}(\text{digit}) = \epsilon - , . , x, y, z, 3$

branch 2 $\rightarrow \text{first}(\text{letter}) = \epsilon 0, 1, 2, 3, 4, 5, 6, 7, 8, 9, 3$

$\rightarrow \epsilon - , . , x, y, z, 3 \cap \epsilon 0, 1, 2, 3, 4, 5, 6, 7, 8, 9, 3 = \emptyset$

inclusion

Integer

branch 1 $\rightarrow \text{first}(\text{digit}) = \epsilon 0, 1, 2, 3, 4, 5, 6, 7, 8, 9, 3$

branch 2 $\rightarrow \text{follow}(\text{integer}) = \text{follow}(\text{oprnd}) = \text{first}(\text{opratr}) \cup \epsilon) 3 \cup \text{follow}(\text{factor}) \cup \epsilon * 3$

$\rightarrow \epsilon 0, 1, 2, 3, 4, 5, 6, 7, 8, 9, 3 \cap \epsilon * ; , ; , +, . , =, !, 3 = \emptyset$

inclusion

Letter Digit

both are trivial cases, proof is not needed.
